/334 cont./

312 water abounds during the rainy season. Then the stream beds, dry during the summer (ravines), swell disproportionately. During the summer months, the scarcity of water is still a serious problem.

313 In areas where water is scarce, there is also a scarcity of firewood, owing to the intensive deforestation. As the felling of the trees moves out from the populated centers of Tierradentro, the acquisition of this item becomes increasingly difficult. The fuel problem in Belalcázar, Cuetando, Chitoquez, Valencia, [314] and Guasdualejo is becoming increasingly serious. Furthermore, [439] charcoal is neither used nor produced for trade in Tierradentro.

[312] [462] Providing firewood for feeding the hearth, as well as water, is more an activity for women and children than for men. In most of the parcialidades, firewood abounds, and ordinarily each dwelling has sufficient reserves to maintain the fire on the hearth. In cold parcialidades, such as Calderas and Lame, reviving the fire through the night is essential for protection [513] against the cold. The natives sleep around the hearth, from which comes the warmth that they need for sleeping, since they use no covering other than the clothing on their own bodies and no mattress other than a hard cowhide.

376 The abundance of water also facilitates the construction of 258 hydraulic mills, in order to utilize this motive force. They are relatively numerous.

Property

423 The lands of the native communities are protected. That is to say, they belong to the parcialidad. They are inalienable. In addition, they are exempt from taxes. This peculiarity of our legislation has fortunately permitted the preservation of the [311] Paez group and their culture. The lands contained within the parcialidades are uncultivated, usable, /335/ or in use. The uncultivated lands of the communities of Tierradentro are rapidly being colonized.

In each parcialidad there is a specific amount of land that belongs to all the members of the community. It is communal land.
